## Personal Statement

Motivated and reliable individual with a Level 3 qualification in Software and Website Development, looking to start a career in DevOps. I enjoy problem solving and working with technology, and I am developing my understanding of systems, deployment, and software workflows. I am a quick learner who works well both independently and, in a team, with strong attention to detail and a strong work ethic. My goal is to develop into a skilled DevOps engineer within a professional environment.

## Education

### Dudley College (2025 – 2026)

Level 2 Plumbing (Predicted High Grade)

### Halesowen College (2022 – 2024)

Level 3 Software & Website Development – DMM

- Built and developed websites through coursework
- Completed projects involving coding, testing, and debugging
- Worked to deadlines and followed requirements

### Pedmore High School (2017 – 2022)

GCSEs – All Grade 4+

## Projects

### Unreal Engine 5 Game Development Project (Personal Project)

- Created a basic game using Unreal Engine 5
- Used Blueprint visual scripting (node-based system) to connect gameplay logic and mechanics
- Designed simple gameplay features and interactions between objects
- Developed understanding of how systems interact within a game engine
- Improved problem-solving and logical thinking through testing and debugging

### Website Deployment & Testing Project (Personal Project)

- Set up and tested a simple website in a local environment
- Made updates to code and re-tested functionality
- Gained understanding of development workflow and basic deployment concepts
- Practised debugging and maintaining organised project files

## Work Experience

### Website Development Project – Jigsaw Company

Halesowen College (May 2024 – July 2024)

- Built a functional website for a real client
- Worked to deadlines and followed requirements
- Tested and improved website performance

## Technical Skills

- Basic HTML & CSS
- Understanding of development workflows and testing
- Experience using Unreal Engine 5 (Blueprint visual scripting)
- Problem solving and debugging
- Familiar with concept of deployment and system structure
- Willingness to learn DevOps tools (Linux, cloud, automation)

## Core Skills

- Problem solving
- Teamwork and communication
- Reliable and good timekeeping
- Organised and detail-focused
- Quick learner

## Interests

- Technology and game development
- Football
- Gym / fitness
